1.3. Course Content:

The training content covers a wide range of topics such as

- conditional formatting,
- lookup functions,
- scenario analysis,
- goal seeking, and
- solver tool
- Power Query for data importing and transformation,
- Power Pivot for creating relationships between datasets, and
- Power BI for visualizing data through interactive reports.

They will also explore VBA programming for developing custom solutions within Excel environment. Participants can expect hands-on exercises throughout the training sessions to reinforce their learning and practical application of concepts covered.

1.4. Outcomes of the Course (By Students)

Positive Feedback:

- Students often mention that advanced Excel courses have helped them become more efficient in their work and have added a valuable asset to their employability portfolio.
- Many learners find the courses interesting and useful, providing them with tools to optimize their learning potential.

Constructive Criticism:

- Some students have expressed that certain courses could improve by offering more opportunities to practice the material and by explaining the underlying logic behind the functions and formulas.
